Basic Wood Lathe - BOWL Turning

This is an entry level wood lathe course. Students will learn basic lathe safety, how to properly sharpen their turning tools, and how to safely and properly use their turning tools.

You will learn how to use 'face plate' and a 'chuck' while turning a small wooden bowl. You will select from our wood supply and glue-up a 'turning blank' that will be mounted on one of our face plates to turn the outside and the bevel for chuck mounting. You will then mount the blank in a chuck and turn the inside of the bowl.

NOTE: The wood turning process generates a lot of flying wood chips and dust. We suggest that you come to class each evening with safety goggles or face shield and a shirt that can be tightly buttoned at the neck. **Absolutely NO loose clothing, dangling jewelry or long hair.**

Course Duration: 9.0 hours Three Tuesday evening classes 6:00 pm to 9:00 pm

Dates: **October 10, 17, & 24, 2017**

Tuition: $45.00 **Materials:** $15.00

Skill level: Beginner

Prerequisite: None

Instructor: Paul Derr, John Meyer, or Ken Andrus

Any questions, call Ken at 570-419-0794 or John at 570-916-8145 or Paul at 570-220-8414
