Set of Three Shaker Oval Boxes

This is an intermediate level course. Students will learn how to bend wood, with the use of a hot water bath, which is the traditional shaker method. We will also discuss the use of a steam chamber, which can be used as an alternative method in the bending of wood. You will make three nesting boxes in sizes #1, #2, and #3.

You will use pre-cut cherry banding blanks for making the sides of your boxes and will select from our wood supply for the tops and bottoms of each box. These are traditional wooden boxes that were built by many Shaker communities around the country. They are both decorative and functional boxes you will be proud to display in your home.

Course Duration: 15 hours Five evening classes 6:00 pm to 9:00 pm

Dates: **November 7, 9, 14, 16, & 21**

Tuition: $75.00 **Materials:** $35.00

Skill Level: Intermediate

Instructor: John Meyer
